Hong Kong – Where east meets west

- 1 Hong Kong is in the south of China. Over 7.2 million people live there. It has a very multicultural society with many different religions, festivals and languages. Hong Kong used to be a British colony, but in 1997 it became a part of China again, and it has kept a separate political and financial system.

- 5 It describes itself as a place where 'East meets West' because of its combination of Chinese and Western influences. Hong Kong is famous for its financial centre and it has its own money, the Hong Kong dollar. It has the most skyscrapers of any city in the world. It also has a busy harbour which is an important business place in Asia. It is also a popular place for tourists.
- 10 Even though most people in the city use its good public transport system, Hong Kong still has a big problem with air pollution, much of which is caused by industries in China. It is one of the most crowded cities in the world, and there are great differences between the rich and the poor in the city.

Answer the questions.

1. Where is Hong Kong? Hong Kong is in the south of China.
2. When did Hong Kong become a part of China again? in 1997
3. Why is Hong Kong a place where 'East meets West'? There is a combination of Chinese and Western influences.
4. What is the city famous for? It is famous for its financial centre.
5. What problems does the city have? The city has problems with air pollution and there are great differences between the rich and the poor in the city.

People spend too much money on clothes. They want the latest fashions, but I think they should save their money for more important things.

- I don't think people spend too much money on clothes. There are lots of department stores where you can get cool clothes for low prices. I agree that it's also important to save some money but going shopping with friends is fun. I think it's OK if you spend some money on clothes and then save some money for other things.

a) Collect five ideas about making your school more eco-friendly. (Lösungsvorschlag)

- recycle all waste
- throw away less food
- save energy with solar panels
- save toilet water
- use public transport

b) Use your ideas to write a short text.

The school should recycle all the waste. It could also save energy with solar panels.
Students should use public transport to go to school. They should also throw away
less food. The school should try to save toilet water.
