

# Kornkreise

zu Aufgabe 7

|             |                 |
|-------------|-----------------|
| Radius 7 cm | Kreisumfang $u$ |
|             | Kreisfläche $A$ |

| Mittelpunktswinkel $\alpha$ | Bogenlänge $b$ | $b : u$ | Sektorfläche $S$ | $S : A$ |
|-----------------------------|----------------|---------|------------------|---------|
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
|                             |                |         |                  |         |
