

Basic aspects of Urban Geography

Why people live in cities – urban functions

1 Make a mind map about the basic functions of human living.

- Note four general examples of buildings or places which fulfil certain functions in a city in the **grey boxes**. You can use ideas from p. 23/M1. When you are done, explain the model to your partner.
- Now note specific places in your hometown (buildings, streets, neighbourhoods, places) for the different functions in the **white boxes**.
- Structure your hometown into different parts which fulfil different functions.
