

Temperate and subtropical zones

Farming in Italy – wine, olives and sheep

1 In northern Italy the climate is very different to the south.

a) Compare the two climate graphs. Talk to a partner and say what is the same and what is different.

	Milan, 211 m 11.4°C 1082 mm	Gela, 33 m 17.3°C 354 mm
		
	Milan	Gela
Temperature		
Precipitation		
Height above sea level		
Climate zone (Köppen – Geiger) (atlas)		

b) Guess which place is better for farming and why?

I think _____ is better for farming because _____

name: _____ class: _____ date: _____

Temperate and subtropical zones

Farming in Italy – wine, olives and sheep

2 It is true that Italy has not the best conditions for agriculture because there are many mountains. However, there are some areas where people can farm.

a) Use a thematic map in your atlas and find out what is cultivated in Italy. Draw pictures and write down the correct English word.

Example: olives			
			

b) Find out where these things are cultivated (atlas). Draw it in the map. Don't forget a key for your map.
