

## Activity 1: Internet research – more global issues

 *In small groups, think of a pressing global issue that has not been covered in this topic. It's now your turn to present it to the class in an interesting and informative way – you have one lesson to do so.*

*Think about what materials you can use to highlight the issue in an interesting manner: video, audio material, a text, visuals etc. Using the internet, find statistics to back up your research, and maybe a personal account or story to make your point. At the end of the presentation there should be a call to action – think about what realistic measures you could take to try to combat this problem. Make sure that the other members of the class have a chance to ask questions and to discuss what you have presented.*
