

## Activity 1: Internet research – volunteering abroad

- 1** 👤 In pairs, choose one of the following countries: USA – UK – Germany – Australia. Using the internet, find statistics about young people who live in the country you have chosen and the time they spend volunteering abroad. As far as possible use official sources so that your statistics are reliable and make sure that you note down the source correctly. Try answer the following questions:

  - What percentage of young people volunteer abroad?
  - Where do they volunteer?
  - What do they do?
  - What are the reasons behind their decision to volunteer?
- 2** Think of how best to present your statistics to the rest of the class. Compare your findings for the different countries.
